• Professor Boitier stimulated my interest in a topic that I had previously not enjoyed in highschool. He was very engaging and related material to applicable current events. • Professor Boitier is an incredible professor. His classes are very well structured and each lecture was informative. • I don't like economics as a subject in general, but I learned a lot and it was very digestible. • Professor Alvaro is great at explaining concepts and explains them clearly that leaves for little room in confusion. • His lecture was clear and offered help by opening many office hours

- Prof. Boitier was very inclusive and the majority of students contributed to class regularly.
- Professor Boitier did a great job including all
- I felt comfortable participating
- I have always felt welcomed to raise my hand when I had questions, even if it strayed slightly off topic.
- I agree with all of the above and think that student's felt like they could participate and ask questions, but also because it's a larger class size some may not have felt as comfortable participating but our professor made us feel comfortable.

- I am not considering taking elective econ classes because of this class.
- Such a great professor, would recommend to anybody.
- very manageable amount of work
- I really enjoyed this class! The one suggestion I would have is to sometimes slow down during the lectures, even though you would ask us if you were going too fast, for me at least I didn't feel very comfortable asking to stop and slow down because it seemed like the rest of the class was done. But overall I would take it again!
